CHEMISTRY: CONNECTIONS TO OUR CHANGING WORLD REVISED 2ND EDITION STUDENT EDITION 2002C

Synopsis

CHEMISTRY:CONNECTIONS TO OUR CHANGING WORLD REVISED 2ND EDITION STUDENT
EDITI...

Book Information

Hardcover: 972 pages

Publisher: PRENTICE HALL (February 1, 2001)

Language: English

ISBN-10: 0130543837

ISBN-13: 978-0130543837

Product Dimensions: 8.1 x 1.6 x 10.2 inches

Shipping Weight: 4.3 pounds

Average Customer Review: 4.5 out of 5 stars 27 customer reviews

Best Sellers Rank: #101,159 in Books (See Top 100 in Books) #24 in Books > Teens >

Customer Reviews

"Theodore L. Brown" received his Ph.D. from Michigan State University in 1956. Since then, he has been a member of the faculty of the University of Illinois, Urbana-Champaign, where he is now Professor of Chemistry, Emeritus. He served as Vice Chancellor for Research, and Dean, The Graduate College, from 1980 to 1986, and as Founding Director of the Arnold and Mabel Beckman Institute for Advanced Science and Technology from 1987 to 1993. Professor Brown has been an Alfred P. Sloan Foundation Research Fellow and has been awarded a Guggenheim Fellowship. In 1972 he was awarded the American Chemical Society Award for research in Inorganic Chemistry, and received the American Chemical Society Award for Distinguished Service in the advancement of Inorganic Chemistry in 1993. He has been elected a Fellow of both the American Association for the Advancement of Science and the American Academy of Arts and Sciences. "H. Eugene LeMay, Jr.," received his B.S. degree in Chemistry from Pacific Lutheran University (Washington) and his Ph.D. in Chemistry in 1966 from the University of Illinois (Urbana). He then joined the faculty of the University of Nevada, Reno, where he is currently Professor of Chemistry. He has enjoyed Visiting Professorships at the University of North Carolina at Chapel Hill, at the University College of Wales in Great Britain, and at the University of California, Los Angeles. Professor LeMay is a popular and

effective teacher, who has taught thousands of students during more than 35 years of university teaching. Known for the clarity of his lectures and his sense of humor, he has received several teaching awards, including the University Distinguished Teacher of the Year Award (1991) and the first Regents' Teaching Award given by the State of Nevada Board of Regents (1997). "Bruce E. Bursten" received his Ph.D. in Chemistry from the University of Wisconsin in 1978. After two years as a National Science Foundation Postdoctoral Fellow at Texas A&M University, he joined the faculty of The Ohio State University, where he is currently Distinguished University Professor. Professor Bursten has been a Camille and Henry Dreyfus Foundation Teacher-Scholar and an Alfred P Sloan Foundation Research Fellow. At Ohio State he has received the University Distinguished Teaching Award in 1982 and 1996, the Arts and Sciences Student Council Outstanding Teaching Award in 1984, and the University Distinguished Scholar Award in 1990. In addition to his teaching activities, Professor Bursten's research program focuses on compounds of the transition-metal and actinide elements. His research is currently supported by grants from the National Science Foundation and the Department of Energy.

"Julia R. Burdge" received her B.A. (1987) and M.S. (1990) degrees in Chemistry from the University of South Florida (Tampa), and her Ph.D. in Chemistry from the University of Idaho (Moscow) in 1994. She then joined the faculty of the University of Akron, where she directed the general chemistry program from 1994 to 2001. Professor Burdge implemented the use of new educational technologies and put significant resources in place to enhance the general chemistry curriculum, including a state-of-the-art computer laboratory for use by general chemistry students. She is a well-liked teacher, known for her ability to explain the principles of chemistry in ways that students can understand and appreciate. Professor Burdge recently accepted a position at Florida Atlantic University's new Honors College in Jupiter, Florida, where, in addition to teaching, she will pursue environmental research with undergraduates.

Authors Herbert and Barbara Apelian Beall are residents of Mineral Point, active in the Mineral Point Historical Society, and have completed several projects and publications in the fields of historic research and preservation-including architectural driving and walking tours. Both are currently professors and writers, combining these experiences with their knowledge and dedication to historic preservation, in order to create a pictorial history of the town that identifies itself as the place "where Wisconsin began."

Good book for high school Regents.

Excellent

This is a great book. My son is getting an A in honors chemistry this year.

perfect for what I needed

Only wish that I had this book when I was a freshman at HS. It goes so deep in such simple language and ease of understanding. Its a really good book for collection.. I normally don't write good reviews but this one I could not control.

thanks

Books in great condition.

I waited one month to get this order and it never arrived. While the seller did say they would give me a refund, because they did not have a replacement, I really need the book for one of my teacher's transfer students. (BTW, they do have other copies for sale at their website so I do not understand why they cannot send a replacement.) Now I have to start the process all over again and the month is wasted. I gave them three stars only because they answered my initial email. I will update this review if I ever get a book from them.
