These two maps in one are excellent and up to date for these areas. We used our GPS but frankly could not plan our 1800 mile trip without the use of a good paper road map all on one page. Which neither a 3x5 inch GPS screen or a multi-page layout of an Atlas can provide. It is a shame that the cyber mindset of doing ALL things online is robbing people of the usefulness of some the real tools of enjoyable and safe travel. This map allowed us to work a new travel route through large construction areas that the GPS simply could not do on the fly while I was driving. My passenger could use the map and we were back on track to our ultimate destination in no time.

Excellent publication. In the computer era, state and provincial road maps have become rare... and

this is like the best of those.

It was perfect for our trip into Canada from Vancouver BC to Calgary AB. We used the map for the big overview, then used our vehicle's Garmin for fine tuning. On a side note, it was a disappointment that the original price sticker showing "\$7.99" was still stuck to this new map. I felt a little ripped off, but it was a learning experience. Anyhow, the map ended up being "priceless."

Used on a lengthy trip to western Canada. Very satisfactory and did not tear after lots of folding

Was grateful to have this map before traveling, as it had been far too long since I had been there. Highly recommend this map!

Needed a magnifying glass to read it! Not worth the paper it was printed on!

Great Map easy to read

Like others have said, it is a map that covers a lot of Canada. If you are looking for more detailed highway information or just not driving across half of Canada you might find a different map or use online mapping services.
