Hydroponics For The Home Grower

Synopsis

Hydroponics offers many advantages to traditional soil-based horticulture. These include greater control over many of the limiting factors, such as light, temperature, and pests, as well as the ability to grow plants in all seasons. With instruction from one of the top recognized authorities worldwide, *Hydroponics for the Home Grower* gives you step-by-step guidance on how to grow tomatoes, peppers, cucumbers, eggplant, lettuce, arugula, bok choy, and various herbs year-round within your home or in a backyard greenhouse. Read an Interview with Dr. Resh here

With Dr. Howard Resh's help, you'll learn:

- Background information on how hydroponics evolved
- The nutritional and environmental demands of plants and how to control these factors
- How to provide formulations of nutrients optimal to the plants you wish to grow
- The many different hydroponic systems you can purchase or build for yourself
- Designs for different types of greenhouses with components to fit your personal taste and budget
- Crop selection and step-by-step procedures, including seeding, transplanting, training, pest and disease control, and harvesting
- Along with when to plant and when to change crops
- How you can grow microgreens on your kitchen counter

The book includes an appendix with sources of seeds and other supplies, along with helpful websites and lists of books, articles, and conferences on growing hydroponically and caring for your crops. By following the guidelines in this book, you'll understand everything you need to know to get your home-growing operation up and running in no time.

ISBN-13: 978-1482239256

Product Dimensions: 9.1 x 6.1 x 0.9 inches

Shipping Weight: 14.4 ounces (View shipping rates and policies)

Average Customer Review: 4.1 out of 5 stars 14 customer reviews

Best Sellers Rank: #262,681 in Books (See Top 100 in Books) #24 in [Books > Crafts, Hobbies & Home > Gardening & Landscape Design > By Technique > Hydroponics](#) #135 in [Books > Textbooks > Science & Mathematics > Biology & Life Sciences > Botany](#) #245 in [Books > Textbooks > Science & Mathematics > Agriculture](#)

Customer Reviews

"By following the guidelines in Hydroponics for the Home Grower, you'll understand everything you need to know to get your home-growing operation up and running in no time." — Paul T. Vogel, California Bookwatch

Howard M. Resh has a doctorate degree in horticulture and is a recognized authority worldwide on hydroponics. He has written five books on hydroponic culture for both commercial and hobby growers and his website (www.howardresh.com) presents information on hydroponic cultures of various vegetable crops. Dr. Resh is the hydroponic greenhouse farm manager for the first hydroponic farm associated with a high-end resort — CuisinArt Golf Resort and Spa in Anguilla, British West Indies. He is a consultant for many unique hydroponic greenhouse operations, including Lufa Farms in Montreal, Canada.

This book is an excellent, exhaustive reference work. I combined it with two other books: DIY Hydroponics, by John Hennessy, and How to Hydroponics by Keith Roberto to get my home hydroponics started.

Have not finished reading it all the way through but I like his presentations based upon his education and experience. I now know how to plan my hydroponic garden for next season. Will try to get some plants growing to extend the use of my Sansun Led grow lights.

This is my go to reference . I have memorized and highlighted sections of this book. Every major area in hydroponics is covered with details on construction , nutrients , training , pruning etc . A must have for the hobbyist .

We just started getting into hydroponics and we love how concise this book is. do not surf the web to find out your info, just buy this book.

Awesome information and help for the beginners in hydroponics

Good info on hydroponics and websites to match.

good

The book was for my son. He read it in one day. LOL
