Great series of books for beginners. My son is currently using this particular book and enjoys it. The difficulty level is just about right for him, and he's been playing about half a year now. The first book was great too!

only complaint not enough duets

My son takes his piano lessons seriously. His teacher suggested switching to Faber adult books. I'm glad we made the change. These books are helping him advance on his piano technique, and theory.

I have been teaching teens and adults from the James Bastien Older Beginner series which is good, but I find that teens are happier with the song selection from the Faber series. You get songs such

as "The Mysterious Casbah", and "Jazz Blast" which entertain as they teach. Also I should point out that the Faber series introduces pentascales before teaching an entire scale. I prefer teaching the entire scale right away. So to sum it up, I prefer the James Bastien method for its theory structure, but like the song selection in the Faber method better. Why not use both? Yep, that's what I do. Happy teaching and playing!

Piano teacher recommended. Great for mastering techniques and learning new skills. A lot of piano teachers and music schools recommend and have these.

I like the exercises and the songs and the fact that they are almost all ones that I have known all these years.

I definitely recommend to piano players who want get back into the groove or want a better challenge. Great for pianists of all ages!

It's a great addition to Book 1, especially if you have an awesome teacher.
