Synopsis

Do you like riddles? Do you like brain teasers? Do you like puzzles? Are you a problem solver? Are you creative? Do you think outside the box? If you can answer yes to any of these questions, this book may be perfect for you.Â Â Introducing a collection of the best riddles, puzzles, and brain teasers that has been years in the making. These will challenge the way you think, introduce you to new ways to look at problems, and expand your mind.Â Â People who love riddles, puzzles, and brain teasers are familiar with the rush of the "aha!" moment, the "that's it!" moment, that "of course!" moment, the moment of clarity that you get when the lightbulb goes off and you've figured it all out. Those moments are great exercise for your mind and brain and will help to keep you mentally sharp.Â Â Even if you are new to riddles, puzzles, and brain teasers this book will be a fun and exciting read, it will help you become a better problem solver and become more comfortable with thinking outside the box. The problems in this book range in difficulty from light & easy to hard to very hard and will provide a challenge for even the sharpest mind.Â Â There are discrete reasoning riddles, mathematical reasoning riddles, practical reasoning riddles, and some classical logic riddles as well, along with the old school problem-solving puzzles that you might have come across in school. There is no word play, the puzzles have definite and satisfying answers, and some of them will blow your mind.Â Â In this book you will be figuring out how to cross bridges, how to escape from prison cells, how to steal rope, how to shoot cyborgs, how to transport bananas through the desert, how to figure out the color of a hat you have on, how to turn on lightbulbs, and how to save a ton of prisoners from being executed!Â Â Enjoy it!Â Â ...and remember, once you peek at the solution you will never be able to unsee it!

This book is the result of hundreds of hours poring over library books, web forums, old notebooks, old conversations with friends, and my own memory! [A](#) Some of these riddles and brain teasers you will find if you look into other books and spend time searching through websites. But you will have a hard time finding such a diverse, challenging, and appropriate collection all in one place. [A](#) When I first started this project I was working with over four hundred riddles that I considered good. Then I focused it down to about 150 puzzles that I thought were very good. Then I kept focusing it down and refining the list of riddles until I landed on 78 brain teasers that I thought were -amazing- and unique. [A](#) For example, any riddle-lover knows that you will come across countless numbers of riddles that involve liars and truth-tellers and so many of them can all be solved using the exact same logic and reasoning. I tried to take the best of those types of riddles and include the greatest ones from each archetype. This keeps the content fresh and exciting with each new riddle, but also allows you to explore all of these different lines of reasoning and solving. It has been an absolute pleasure putting this collection together and I hope that you enjoy having such a wide but focused collection of riddles all condensed into one place!-Zack

Zack Guido has composed the best book of riddles I've seen. As the other reviewers said, the riddles are not the silly childish ones that barely make you smile nor are they the cheap tricky ones that don't test your reasoning at all. These riddles vary in difficulty from simple enough for most to difficult for everyone. They get more difficult as the book progresses, inviting you to challenge yourself as you begin to flex your mind. I recommend this book for anyone who is new to riddles, has a slight interest in riddles, or even the old pro. I found myself enjoying the author's rewritten versions of old riddles I have heard before. The wording is clear and compelling. A note on the format: the links to the solutions from each riddle is very handy, as the links back from the solutions are. A well crafted piece of work in all aspects.

Son who is 14 loves annoying us with riddles; *smile* so, when santa gave him this I asked myself what did I get myself into?! He loves it and all new riddles make for great dinner time conversation. (But he had more arsonal now *wink*)

My boyfriend loved this! He is obsessed with riddle and even makes up his own. My problem is he always tries to get me to solve them or make some up for him... I SUCK at that. So I bought this for him to give him a real riddle challenge and it delivered. He no longer asks me to make riddles up but he still tries to get me to solve them (grr) cant win them all though and I'm glad I bought this book!

The riddles are long. My ten year old loves riddles, brain teasers, and language puzzles. These were fun for him. He retold many of them and stumped his listeners.

gave as a gift and they love it

Cute little book!

We keep this book in the family vehicle! Large family and everyone loves it when I read the riddles for them to solve :)

My kids love the riddles!
