Maps And Globes (Reading Rainbow Book)

Synopsis

This comprehensive look at geography and the environment, *Maps and Globes*, can take you anywhere— to the top of the tallest mountain on earth or the bottom of the deepest ocean. Maps tell you about the world: where various countries are located, where the jungles and deserts are, even how to find your way around your own hometown. If you take a fancy to any place on earth, you can go there today and still be home in time for dinner. So open a map, spin a globe. The wide world awaits you. Supports the Common Core State Standards

Maps and globes can take you anywhere -- to the top of the tallest mountain on earth or the bottom of the deepest ocean. Maps tell you about the world: where various countries are located, where the jungles and deserts are, even how to find your way around your own hometown. If you take a fancy to any place on earth, you can go there today and still be home in time for dinner. So open a map, spin a globe. The wide world awaits you.

Jack Knowlton was born in Florida. He is a free-lance writer living in New York City and is the author of *Geography from A to Z* and *Maps and Globes*, which was featured on Reading Rainbow.

Maps & Globes is a wonderful little book choked full of information for children ages 7 to 10. It gives the history of map making and how to read maps, explains the difference between physical and political maps, tells how to measure the earth with a globe and piece of string. It's a gift for my granddaughter, but I've looked inside the covers and learned a bit for myself.

Great introduction for Early Childhood

Written for 7-10 year olds, this colorful book introduces young readers to the basics of maps and globes, such as a map's uses, direction, the equator, scale, legends, latitude, longitude, elevation and the difference between physical and political maps. Illustrations are simple, colorful and informative. Well done.

Very detailed! Excellent resource book for teaching kids about mapping -

This is a fantastic map book for young children. I ordered a used copy and it arrived in perfect shape. What a great book for a great value. We homeschool and I have found this book indispensable with young children when using a map.

Great

Wonderful Introduction.

Good book to help kids explore and use maps and globes. My daughter has been learning about maps and mapping in school so this book helped her solidify the things she learned in school.
