Founded in 1915 as the Cartographic Group, the first division of National Geographic, National Geographic Maps has been responsible for illustrating the world around us through the art and science of mapmaking. Today, National Geographic Maps continues this mission by creating the world's best wall maps, recreation maps, atlases, and globes which inspire people to care about and explore their world.

It is a good topo map of the area. Although it states that it is updated regularly, don't believe it. Even though many have noted that there are no mileage, nor good side elevations counters of the trails, they are still not on the maps. You still need to make those up from others sources. No good excuse for that purposeful oversight.

Very good companion to a Bryce Canyon guidebook. The paper quality is excellent and this map will avoid tears and damage due to moisture. It is a good carry-on-the hike companion or as a planning guide to get a feel for the topography of various trails.

Love NGM maps as they are so detailed and helpful for hiking, etc. Purchase them for all the planned vacations as they are full of information and correspond nicely with hiking books and hiking programs like All Trails.

These National Geographic Maps are phenomenal. They feel like a waxy paper but if you try to do a small tear along the edge it stretches instead of tearing like paper so they seem to be made from a plastic paper instead. So that is how they are waterproof and tear proof. I found the detail really good with great hiking information and some geological information on many of these maps.

This is a great map with much detail. We haven't yet visited the Bryce Canyon but I'm sure the map will be useful. My only complaint is it's very large when unfolded and that could be awkward when hiking.

I love these, but since the park was covered up in snow when we got there, we did not get to use it.

We went to Utah and visited several National Parks. These maps were great. We did several 15 mile hikes and 40 mile bike rides, without these maps we would have gotten lost. They are very

detailed and help you stay on course.

These trails illustrated maps are the first thing I order when I'm traveling to national forest or park to hike and camp. Besides being virtually indestructible they are invaluable with all the information one would need.
