Everything You Need To Ace Science In One Big Fat Notebook: The Complete Middle School Study Guide (Big Fat Notebooks)

Synopsis

It's the revolutionary science study guide just for middle school students from the brains behind Brain Quest. **Everything You Need to Ace Science . . .** takes readers from scientific investigation and the engineering design process to the Periodic Table; forces and motion; forms of energy; outer space and the solar system; to earth sciences, biology, body systems, ecology, and more. The BIG FAT NOTEBOOK series is built on a simple and irresistible concept—borrowing the notes from the smartest kid in class. There are five books in all, and each is the only book you need for each main subject taught in middle school: Math, Science, American History, English Language Arts, and World History. Inside the reader will find every subject's key concepts, easily digested and summarized: Critical ideas highlighted in neon colors. Definitions explained. Doodles that illuminate tricky concepts in marker. Mnemonics for memorable shortcuts. And quizzes to recap it all. The BIG FAT NOTEBOOKS meet Common Core State Standards, Next Generation Science Standards, and state history standards, and are vetted by National and State Teacher of the Year Award-winning teachers. They make learning fun, and are the perfect next step for every kid who grew up on Brain Quest.

I home school two boys and friends and family are always asking how I know what to teach my kids. It cracks me up, but now I can say I have a guide that tells me everything they need to know for middle school according to Common Core. We officially don't follow Common Core in Texas, but in reality the schools teach it since the kids have to take standardized tests that follow it. These guides are great! I read them to my 4th and 6th graders and then supplement with YouTube/history channel/etc videos and books with photos. It is nice to know that I am covering at least the minimum they need in case they ever have to go to public schools. God forbid. ;-) I think these books explain things well and I like the questions at the end of each chapter. These are really a great resource for homeschooling. I personally am not a fan of paying big money for curriculum, so these books are a

valuable and affordable resource.

My 10 year old LOVES this series. She actually goes home after school and reads on her own. 'Nuff said!

Provides a very organised approach to science. Has great ideas for retention of knowledge.

Purchases this book for my son, who is having issues with science. He loves his book and he is using it in class to keep up with the teacher.

Wow, it must be fun to read or something because kids can't seem to get enough of these...

Great book! Colorful and easy to read! Content is well-organized. I recommend this book for grades 5-7 to teach or reinforce science concepts!

My 13 year old daughter loved this book- found it helpful with quick study reviews.

My grandson said this book is very useful for him. It was delivered undamaged and very quickly. Thank you. A++++++.
