**GET RID OF
LICE AND NITS**

Head lice, pubic lice and body lice
advice, treatment and prevention

Dean M. Simon

Synopsis

Lice are parasitic insects that can be found on people's heads, and bodies, including the pubic area. Lice are highly contagious although they can't jump or fly, but they can spread easily from one person to another through close contact or by sharing personal items. A female head louse can lay several eggs each day. So, it's best to treat lice quickly once they're found. This publication intends to offer a brief overview of lice advice, treatment and prevention. It cannot be used for self-diagnosis or as a substitute for consultation with a health care provider. If you have any questions about lice or think that you may have a lice infestation, please consult a health care provider. You may find updated contents on lice at www.getridofliceandnits.com.
