Environmental Science: Active Learning Laboratories And Applied Problem Sets

Synopsis

One of the few lab books available in the field, Environmental Science is designed to provide environmental scientists with active learning situations that demonstrate the impacts of interactions between humans and the environment. It encourages readers to reflect on real life conditions and the connection to the environment and sustainability. Emphasis is placed on writing and communication through lab reports, presentations, and real-world scenarios. Environmental scientists will be able to apply concepts in the lab and gain a stronger understanding of the field.

Customer Reviews

A good buy for environmental science teachers/students - most of the activities contain really useful background information and the lab write-ups are well-structured. The only thing to note is that some of the lab experiments require some material/equipment that may not be available or expensive to purchase

This book was very cheap, with not a single mark in it. That is amazing for a used textbook. Found out once my son started AP high school classes that allows him to take college courses that they were supplying textbooks. Oh well, returning it is a pain and I'll probably sell it next year. Class A+ on condition, shipping charges and overall value

This book provided many variations on experiments and new ideas to implement into an AP-ES

course. I will definitely be adding a large number of activities to the curriculum.Thanks

fantastic

The labs presented in this book are okay. They're nothing too complex however I have found a few of them confusing. Still, they get the point across, just not very well in my opinion.

Good price and good quality product. I like it and it does what I expected it would do. Thank you

I received this book right before my class started. The sender packaged it well and shipped it fast to its destination.

This product was perfect for the lab I'm taking in college. It was, best of all, the correct book I ordered this semester!
