Customer Reviews

Great, well written story. Really like how they search for Originators race on the verge of extinction

and the battles to find and protect those lost for countless ages. Good use of technology and how they have to keep adapting to stay ahead in weapons used as they find themselves in a complicated arms race.

Fantastic book. This entire series from Moon Wreck to The Search For the Lost has been enjoyable. The author has taken us from a planet and moon to a solar system and galaxy to a universe. The storyline for the entire series flows well and keeps you interested throughout. Can't wait for the last book.

I have been an avid reader of all of the books in this series. As before and as I have come to expect, this book does not disappoint, the story keeps you involved and you just can't put it down. The story keeps you involved, the battles and personal dramas keep you hanging out there and you keep trying to guess how it will end. After reading that there will be just one more book to finish the series I was very sad since there seems to be enough material for at least 2 more books to really close all the story lines.

Raymond weil series is actually the best scfi series I have read to date. This book is a just awesome and breath taken I am a little disappointed that the next book will be the last entry in the series, I am hoping t that the author might give us a additional book in the series.

as with all his books they are a great read and the action is great and non stop. can't wait for the other books of the other series.

This book did not disappoint! Non stop action with exciting space battles! Can hardly wait for the next book. Sadly the series will end. Keep writing, Raymond. I love your books.

Good series with likeable characters, I plan to keep reading them. The price also seems reasonable for the entertainment you get

I have enjoyed the whole series and look forward to the next book. Lots of action, likeable and nasty characters that fill space with great battles.
