Merhorses And Bubbles (Zoey And Sassafras)

Synopsis

With magical animals, science, mystery, and adventure -- the brand new series Zoey and Sassafras has something for everyone! Easy-to-read language and illustrations on nearly every page make this series perfect for a wide range of ages. In the third book of this series, Zoey and Sassafras head to the stream only to make a terrible discovery. Things get even more urgent when they learn that the magical creatures living in the stream are in danger! Can Zoey and Sassafras solve the mystery of the stream and save the Merhorses?

Age Range: 5 - 9 years

Grade Level: Kindergarten - 4

Customer Reviews

Praise for DRAGONS AND MARSHMALLOWS (Zoey and Sassafras, Book 1): "Concepts are explained concisely and clearly, and a short glossary provides valuable vocabulary building. The slightly larger font makes the text inviting for emerging readers, and the illustrations blend perfectly into the story. Sassafras and the dragon prove to be able sidekicks in the vein of Disney characters...while this book is a natural fit for STEM collections, it deserves a place in all libraries serving young readers." -- School Library Journal "...Citro gracefully balances her story's scientific and fantasy elements." -- Publishers Weekly "...the imaginative premise and the

incorporation of STEM elements make this an attractive and engaging choice." -- Booklist"...tales for young audiences that model the scientific method are nice to see." -- Kirkus Reviews"...a delightful beginning reader. I will definitely recommend this to kids and I look forward to the other books in this series." -- Mel Barnes, University Bookstore"Zoey and Sassafras are our heroes! My kids love unravelling their mysterious circumstance, and they even made their own "thinking goggles." Zoey is an awesome role model." -- Megan Lingo, Reading Teacher and Educational Therapist at Chickadee Lit

Asia Citro, M. Ed, is a former classroom science teacher with a Master's in Science Education. She is the author of 150+ Screen-Free Activities for Kids, The Curious Kid's Science Book, and A Little Bit of Dirt. She is also the creator of the popular blog Fun at Home with Kids. Her work has been featured on "Apartment Therapy, The Chicago Tribune, Today, Disney Baby, MSN, King 5 TV," and "Highlights," among others.

What a wonderful introduction to environmental science for kids! As with *Dragons and Marshmallows* (Zoey and Sassafras) and *Monsters and Mold* (Zoey and Sassafras), the scientific method is presented in an appealing way for the younger elementary crowd. We paired this book with Asia's other book, *A Little Bit of Dirt: 55+ Science and Art Activities to Reconnect Children with Nature*, to discuss water pollution. We can't wait for the next one to come out!

My 7 year old daughter loved this book. She has used it as a springboard for so much deeper thought about earth care, and is so excited about planning an upcoming trip to the stream for observation. But her FAVORITE part of this book was that Pip the frog showed up as one of the characters Zoey interacted with!

Although my 6 year old kindergartner hasn't read it yet, she'll be ready to about this summer or towards the end of the year. I love that it has illustrations, & that the size of the font is very readable. The book also does a good job on placing emphasis on certain words so the reader can grasp the concept.

These books are the absolute cutest series. My son adores them and gets so excited to read each new book in the series.

Love Zoey and Sassafras! Science and fun all wrapped up in one cute story together! It's kid-lit perfection!

We got all three books . My 2nd grader loved them and we hope to see other books from the author soon

Amazing book about science and the scientific method that kids can get into. I read this aloud to my 4 and 6 year old kids and we all loved it!! Highly recommend!

My 9 year old is really enjoying this series! Fans for life! Thank you!
