Porous Silicon For Biomedical Applications (Woodhead Publishing Series In Biomaterials)

Synopsis

Porous silicon has a range of properties, making it ideal for drug delivery, cancer therapy, and tissue engineering. *Porous Silicon for Biomedical Applications* provides a comprehensive review of this emerging nanostructured and biodegradable biomaterial. Chapters in part one focus on the fundamentals and properties of porous silicon for biomedical applications, including thermal properties and stabilization, photochemical and nonthermal chemical modification, protein-modified porous silicon films, and biocompatibility of porous silicon. Part two discusses applications in bioimaging and sensing, and explores the optical properties of porous silicon materials; in vivo imaging assessment and radiolabelling of porous silicon; and nanoporous silicon biosensors for DNA sensing and for bacteria detection. Finally, part three highlights drug loading and characterization of porous silicon materials, tumor targeting and imaging, and porous silicon scaffolds for functional tissue engineering, stem cell growth, and osteodifferentiation. With its acclaimed editor and international team of expert contributors, *Porous Silicon for Biomedical Applications* is a technical resource and indispensable guide for all those involved in the research, development, and application of porous silicon and other biomaterials, while providing a comprehensive introduction for students and academics interested in the field. Comprehensive review of porous silicon focusing on the fabrication and properties of this emerging material. Specifically discusses drug delivery and orthopedic applications of porous silicon. Aimed at materials researchers and scientists in the biomaterials industry – particularly those concerned with drug delivery and orthopedics.

Book Information

Series: Woodhead Publishing Series in Biomaterials

Hardcover: 558 pages

Publisher: Woodhead Publishing; 1 edition (February 26, 2014)

Language: English

ISBN-10: 0857097113

ISBN-13: 978-0857097118

Product Dimensions: 6.3 x 1.4 x 9.3 inches

Shipping Weight: 2.1 pounds (View shipping rates and policies)

Best Sellers Rank: #1,022,382 in Books (See Top 100 in Books) #35 in [Books > Textbooks > Medicine & Health Sciences > Reference > Instruments & Supplies](#) #54 in [Books > Medical](#)

Customer Reviews

Dr Håkan A. Santos is an Adjunct Professor in Pharmaceutical Nanotechnology, Division of Pharmaceutical Technology, Faculty of Pharmacy, University of Helsinki, Finland. He is the founding editor-in-chief of the Mesoporous Biomaterials journal, acts as editorial board member in several other journals, and has also won a number of awards for his research.
