Synopsis

Natural & Organic Liquid Soap Making Business Startup Learn How to Make Shampoo, Conditioner, Body Wash, Sunscreen Lotion, Muscle Balm, Hand Sanitizers, Pet Shampoo & So Much More!

I started making Body wash, shampoo and conditioners in 2004 when after a couple of allergy tests my dermatologist advised me not to use any store bought soap or shampoo. The doctor said my skin discoloration issue was an adverse chemical reaction from the soap. Soon my necessity to make soap became a true passion. It wasn't until 2012 when my husband got laid off from his job, I had to seriously think about how to turn my passion into a small home based business, and I did. I grew my business into a decent business making not only Shampoos or liquid soaps, but I ventured into making body scrubs, body wash, SPF lotions, muscle rubs, bug repellent, hand scrub (mostly for my husband, so he can use after working on his 65 Mustang), hand sanitizer and even dog shampoo for our 10 years old Dalmatian. This book is not about my success in business, but I want to focus on you and your ability to make your passion into a home based business which can potentially grow into a big business. Lately, the new trend is all organic and all natural Beauty products, so I think this is the right time to get into this business. I put my best efforts to make this book easy to read and follow so you can get started and see a big success in a short period of time. In this book, my goal is to make you understand and learn how each ingredient works with each other and how to create your own recipes and flavors, so your creative side comes out and creates something unique that is truly yours and only yours. If you are looking to learn the process, then this is the book for you but if you are just looking just for recipes then this is not the book for you. This book is Divided into Two Parts. In the First Part, I Show you How to Actually Create Your Product Line

One advice,

Customer Reviews

nice little book, has a few recipes, wish it had more. mostly talk about starting a business for soap making...which is on the cover. but I thought it would have more recipes. if you want to know how to start a soap business this is a great start

Yes this was exactly what I was looking for!! I'm still reading it but I will be trying the soap recipes very soon!!

good

Being a fiction writer myself, as I read this book, I did come across a few minor grammatical errors and such, which can be annoying. But after finishing the book, I realized, it is not about grammar, but usefulness of the content she shared here. To her defense, she did mention at the end of the book that she is a pro when it comes to writing. I got so much out of this book, that I think it will be silly not to overlook those mistakes as the value of her content sure outweighs everything else. I am giving it a 5 star.

Found this interesting book on a limited time promo, wanted to learn how to make hand soap and hand sanitizers as we go through top of those each month. As I read the book, I had a question, how can using Borax be natural when the author claims it right on the title, but to my surprise, my husband did some research on Wikipedia and found Borax to be a natural product typically found on dry lake beds. I must say this book is well worth the price, as it has so much information packed in it. Also didn't know making hand sanitizers can be such an easy task, we will be making our own from now on and yes we will add some essential oil in it.

Downloaded this book when it was on free promo, and I am glad I did. We are thinking about starting a boutique home based soap making business to sell mostly through online. I was blown away with the details this author shared in this book. After finishing this book, my wife decided we need to add pet shampoo to our line of products as well. Anyone interested in learning about how to make soap, shampoo to even face mask, this is THE BOOK for you. We want to give our sincere thanks to the author for sharing such vast knowledge. This is one of those books that you can tell is not put together by a quick online research like so many books are now a days. Excellent handbook.

my friends approval just order early Very cool. I love these a lot. I am very fond of. Beyond my imagination, I think it might be bad. But when I received, I am very satisfied. Great product, most people do not believe I'm in the at such a low price to buy it. we were very pleased to have them.
